The presence of music and dance, in the national identity, is essential in the encounters between Colombians, and is also an instrument to give other nations the ability to understand Colombia from the internal perspective of our artists and their vision of Colombia. Colombia guest country Waves Festival in Vienna

September 5th to 7th, 2024

We are delighted to be Guest of Honor for this year's Waves Vienna Festival. It will be a great opportunity for the Viennese public to experience the passion of our artists. Music is part of the Colombian DNA. We sing and dance. Colombia's soundscape is as diverse as its people. We hope to bring some of that combination of rhythms here. The festival is also a way to highlight cultural interaction. We have many artists living in Austria who have been influenced by their encounter with Austrian musical traditions and are combining new knowledge with their Colombian roots to create exceptional music. We look forward to exciting performances and revolutionary music. Garcia Marquez used to say that beauty in art makes art revolutionary, and I am sure you will hear beauty in our music. - Laura Gil, Ambassador of the Republic of Colombia.

Ledania

“Comm:unity” is a group exhibition that presents a variety of contemporary perspectives from international female artists in the context of the collective identity of street art. It is a tribute to disruptive communities that challenge the status quo, advocating for equality and inclusivity. Female artists not only bring color and life to our cities, but also form a community among themselves, albeit not always in a structured way, that resembles each other through their artistic practices and approaches to the artistic process. In the case of the exhibition, they combine subculture and high culture in a fascinating dialogue.

A cuatro voces Concert

Thursday, June 13th at 20:00hs

A cuatro voces

Mi Barrio
Münzwardeingasse 2, 1060 Wien

The organization mundo redondo, in collaboration with Machi Producciones from the center of the Colombian and academic region, present a modern and rooted proposal that not only touches many strings and ears, but also the harmonies of the hearts. The musical proposal is elaborated through the creation of the arrangements, exploring the timbre and expressive possibilities of the four instruments; resulting in contrapuntal dialogues both in the voices and in the two guitars, creating sound textures of impressive colors. The verve and beauty of Colombian Andean music and the other genres they interpret, allow the listener to get involved with this music, in a format that is not conventional and therefore offers a different aesthetic perspective that constantly dialogues with tradition.
